CHART STATUS

Possible fertile pattern

We noticed a possible pattern in what you recorded, from June 1 2026 through P+3 on June 15 2026.

This chart-based estimate does not confirm ovulation, identify safe or infertile days, predict pregnancy, or provide pregnancy-avoidance guidance. Special contexts-including postpartum or breastfeeding, perimenopause, recent hormones, relevant medication effects, and persistent discharge-are not supported or accounted for in this first release.

Day-by-day chart

One row per date. Multiple observations use the strongest mucus result.
